DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/06/2006 has been entered.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 19, drawn to a system and method of searching based on a member information database storing home addresses and proximal stations to retrieve information in a predetermined range of home address and proximal station, classified in class 707, subclass 5.
- II. Claims 13, 15 and 16, drawn to a method of searching by creating a searching expression and providing information by changing a searching condition based on a moving speed to exclude information when the user moves by a train, classified in class 707, subclass 4.
- III. Claims 17, 21 and 22, drawn to a method of searching by obtaining a current location of a user for storing as a move history and providing information suitable for the move history by changing a search condition based on the move history, classified in class 707, subclass 6.
- IV. Claims 18 and 23, drawn to a method of providing online shopping and service information by changing a search condition based on a weather condition and

Art Unit: 2168

providing information at a higher priority when the weather condition is a day without rain and a rainy day regarding to traveling by foot or car, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a system and method of searching based on a member information database storing home addresses and proximal stations to retrieve information in a predetermined range of home address and proximal station, Group II is drawn to a method of searching by creating a searching expression and providing information by changing a searching condition based on a moving speed to exclude information when the user moves by a train, Group III is drawn to a method of searching by obtaining a current location of a user for storing as a move history and providing information suitable for the move history by changing a search condition based on the move history, Group IV is drawn to a method of providing online shopping and service information by changing a search condition based on a weather condition and providing information at a higher priority when the weather condition is a day without rain and a rainy day regarding to traveling by foot or car. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2168

Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
